

Meet Rx Destroyer

Drug disposal
made simple!

Rx Destroyer is a fast acting ready-to-use chemical digestion formula that begins neutralizing medications on contact, complying with the 2014 DEA Non-Retrieveable Standard 21 CFR and the 2019 EPA's 40 CFR.

WHO NEEDS DRUG DISPOSAL?

All DEA registrants. Non-retrievable drug deactivation actively protects people, communities and the environment by eliminating risk of wrongful misuse or incorrect disposal.

WHAT MAKES RX DESTROYER DIFFERENT?

Simplicity. Comes 'ready to use' - no water to add, no batteries to change, and a child resistant cap. Our deactivation products are simple, cost efficient, and reusable.

WHAT CAN I PUT IN RX DESTROYER?

Between our two formulas, Rx Destroyer accepts: pills & capsules, liquids, Lozenges, suppositories, oxycodone, fentanyl, creams, powders, transdermal patches, Marijuana (THC).

How to Use Rx Destroyer

1 ADD

2 SHAKE

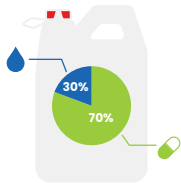

3 DISPOSE

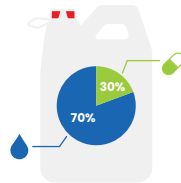

Which Rx Destroyer is right for you?

STEP 1: FORMULA

If you are disposing of 70% or more solid medications, choose the **All-Purpose formula.**

If you are disposing of 70% or more liquid or syringe medications, choose the **Liquid formula.**

STEP 2: SIZE

Rx Destroyer offers a variety of size options to cater to diverse disposal requirements. Select the most suitable size in accordance with your monthly pharmaceutical disposal volume.

STEP 3: SECURE MOUNTING

Wall Mounts secure containers with a security cable, mitigating risk of diversion, product theft or misplacement.

Lock Boxes enclose the Rx Destroyer bottle with medical grade steel, the only part of the bottle you have access to without the key is the neck of the bottle, designed for maximum security.

STEP 4: MAX FILL UTILIZATION

Quick dispensing of mass quantities of medications into Rx Destroyer drug disposal system is even easier with our funnels. Improving disposal speed and cleanliness, our purpose-designed funnels mitigate splash and spillage.
